Week 3 Quiz

Quiz, 6 questions

5/6 points (83.33%)

Congratulations! You passed!

Next Item

1 / 1 point

1.
What is a Convolution?

- A technique to make images smaller
- A technique to filter out unwanted images
- A technique to make images bigger
- A technique to isolate features in images

Correct

0 / 1 point

2.
What is a Pooling?

- A technique to combine pictures
- A technique to make images sharper
- A technique to reduce the information in an image while maintaining features
- A technique to isolate features in images

This should not be selected

Week 3 Quiz

Quiz, 6 questions

5/6 points (83.33%)

1 / 1 point

3.

How do Convolutions improve image recognition?

- They make the image clearer
- They make the image smaller
- They make processing of images faster
- They isolate features in images

Correct

1 / 1 point

4.

After passing a 3x3 filter over a 28x28 image, how big will the output be?

- 26x26

Correct

- 28x28
- 31x31
- 25x25

1 / 1 point

5.

After max pooling a 26x26 image with a 2x2 filter, how big will the output be?

- 56x56
- 13x13

Week 3 Quiz

Quiz, 6 questions

5/6 points (83.33%)

Correct

- 28x28
- 26x26

---

1 / 1 point

6.
Applying Convolutions on top of our Deep neural network will make training:

- It depends on many factors. It might make your training faster or slower, and a poorly designed Convolutional layer may even be less efficient than a plain DNN!

Correct

- Slower
- Stay the same
- Faster
