Week 1 Quiz
Quiz, 8 questions

7/8 points (87.50%)

,	Congratulational You paged!	Nove learn				
	Congratulations! You passed!	Next Item				
<b>~</b>	1 / 1 point					
1. What i	s the name of the object used to tokenize sentences?					
	WordTokenizer					
0	Tokenizer					
Correct						
	TextTokenizer					
	CharacterTokenizer					
<b>~</b>	1 / 1 point					
2.						
What i	s the name of the method used to tokenize a list of sentences?					
0	fit_on_texts(sentences)					
Correct						
	tokenize_on_text(sentences)					
	fit_to_text(sentences)					
	tokenize(sentences)					

7/8 points (87.50%)

Once you have the corpus tokenized, what's the method used to encode a list of sentences to use those tokens?

- text\_to\_tokens(sentences)
- texts\_to\_tokens(sentences)
- text\_to\_sequences(sentences)
- texts\_to\_sequences(sentences)

## Correct

1/1 point

4.

When initializing the tokenizer, how to you specify a token to use for unknown words?

- unknown\_word=<Token>
- out\_of\_vocab=<Token>
- unknown\_token=<Token>
- oov\_token=<Token>

## Correct

1/1 point

5

If you don't use a token for out of vocabulary words, what happens at encoding?

- The word is replaced by the most common token
- The word isn't encoded, and the sequencing ends

Ó	The word isn't encoded, and is skipped in the sequence			
Correct				
	1/1 point			
-	nave a number of sequences of different lengths, how do you ensure that they are understood when o a neural network?			
	Specify the input layer of the Neural Network to expect different sizes with dynamic_length			
0	Use the pad_sequences object from the tensorflow.keras.preprocessing.sequence namespace			
Corr	ect			
	Process them on the input layer of the Neural Netword using the pad_sequences property  Make sure that they are all the same length using the pad_sequences method of the tokenizer			
<	0 / 1 point			
you l esult?	nave a number of sequences of different length, and call pad_sequences on them, what's the default			
	Nothing, they'll remain unchanged			
	They'll get cropped to the length of the shortest sequence			
0	They'll get padded to the length of the longest sequence by adding zeros to the end of shorter ones			
	should not be selected

Week 1 (Quiz, 8 questio		7/8 points (87.50%)
8. When p	padding sequences, if you want the padding to be at the end of the sequence, how do yo	u do it?
	Pass padding='after' to pad_sequences when initializing it	
	Call the padding method of the pad_sequences object, passing it 'after'	
0	Pass padding='post' to pad_sequences when initializing it	
Corre	ect	
	Call the padding method of the pad_sequences object, passing it 'post'
